

Technical Textiles

REACH regulation 1907/2006

Dear customer,

With this statement we would like to inform you about the position of Beaulieu Technical Textiles in respect of the REACH-regulation. All measures are in place to ensure REACH compliancy. We will continue our efforts in monitoring further developments in the REACH-regulation as well as in assuring further compliance in this matter.

Beaulieu Technical Textiles is a downstream user of “substances” and “preparations” (dyestuffs/chemicals), a textile (=article) manufacturer. In order to perform our duty we are taking the following actions.

Our textile products are “articles” and are therefore not submitted to any registration obligations, except for the intended released chemical substances (not included in our article range). Secondly, the European Chemical Agency (ECHA) publishes, on a regular basis, a list of substances of very high concern (SVHC) on the Candidate list (<http://echa.europa.eu/web/guest/candidate-list-table>). All required communications are uniquely linked to this official list. None of our products contains such a substance, above 0.1 % (w/w).

Additionally, our textile products comply to all the restrictions, as mentioned in annex XVII of the Reach-regulation. Based upon our own and our (European and non-European) suppliers’ current knowledge, we can inform that we do not use any of these substances.

We also trust that our statement is an answer to all your enquiries, questionnaires and concerns related to REACH within the framework of our collaboration. However, we are at your disposal for any additional questions.

Please don’t hesitate to contact us should you have any further questions relating to the above.

Sincerely yours,

Ives Bourgonjon
Manufacturing Director for the business unit Engineered Products (BEP)
